## What is claimed is:

- 1. A composite material comprising:
- (a) a first layer which comprises a prefabricated microcells component, a surfactant component, surfactant-generated microcells, a filler component and a binder component; and
- (b) a second layer comprising a metallic component adhered to the first layer.
- 2. A composite material comprising:
  - (a) a substrate;
- (b) a first layer adhered to the substrate to provide a coated substrate, said first layer comprising a prefabricated microcells component, a surfactant component, surfactant-generated microcells, a filler component and a binder component; and
- (c) a second layer comprising a metallic component adhered to the coated substrate.
- 3. The composite material according to claim 2, wherein said substrate is planar and said first layer is adhered to one side of the substrate.
- 4. The composite material according to claim 2, wherein said substrate is planar and said first layer is adhered to both sides of the substrate.
- 5. The composite material according to claims 3 or 4 wherein said second layer is adhered to one side of said coated substrate.
- 6. The composite material according to claims 3 or 4 wherein said second layer is adhered to both sides of said coated substrate.
- 7. The composite material according to claim 1, wherein said first layer is planar and the second layer is adhered to one side of the first layer.
- 8. The composite material of claim 1, wherein the first layer is planar and the second layer is adhered to both sides of the first layer.
- 9. The composite material according to claims 1 or 2 wherein said composite material further includes a water repellent material.

- 10. The composite material according to claims 1 or 2 wherein said composite material further includes an antifungal material.
- 11. The composite material according to claims 1 or 2 wherein said composite material further includes an antibacterial material.
- 12. The composite material according to claims 1 or 2 wherein said composite material further includes a surface friction agent.
- 13. The composite material according to claims 1 or 2 wherein said composite material further includes a flame retardant material.
- 14. The composite structural material according to claims 1 or 2 wherein said composite material further includes an algaecide.
- 15. The composite material according to claims 1 or 2 wherein said composite material is colored with dye.
- 16. The composite material according to claims 1 or 2, wherein the metallic component is selected from a group consisting of aluminum or stainless steel.
- 17. The material according to claim 16, wherein the metallic component is aluminum foil.
- 18. The composite material according to claims 1 or 2, wherein the filler component is clay.
- 19. The composite material according to claims 1 or 2, wherein the surfactant component is a fast soap.
- 20. The composite material according to claims 1 or 2, wherein the surfactant component forms surfactant-generated microcells.
